

HOW TO Create a Dashboard Account

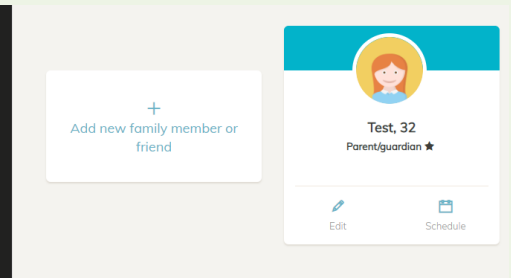

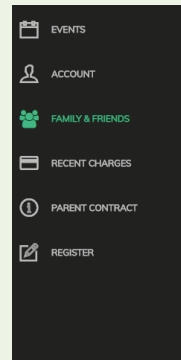

Go to www.eurekasciencemuseum.org/dashboard

1. Create an account

Create an account, check your email, and complete your registration. Log in to your new account.

2. Add Family and Friends

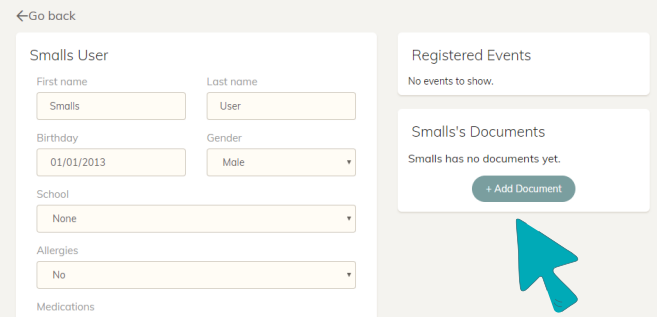

Create a user for each family member - make sure there are two adults listed as parent/guardians.

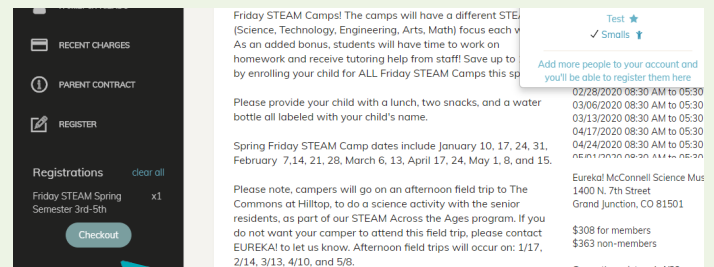

If your child attends a D51 school, charter school, or Holy Family, you will not have to upload an immunization record to register your child. Be sure to add your student's school to their account.

If your child does not attend one of the above-mentioned schools, you will be prompted to upload current immunization records for each child before registering for a program at EUREKA!

3. Upload

Select your event, click register, and select the family member to register for each event.

5. Checkout!
